

## **FY2009 Budget Summary**

### **Introduction**

President Bush delivered his \$3.1 trillion FY2009 budget to Congress on February 4. His proposal would balance the federal budget by 2012. In order to accomplish this goal, overall discretionary spending would be held to an increase of less than one percent in FY2009 and for the four-year period thereafter. Security spending, both at home and abroad, would increase by 8.2 percent in FY2009; defense spending would increase by 7.5 percent. International affairs spending also would increase by 14.9 percent to, among other goals, “support key allies in the Global War on Terror and improve [our] response to international crises, to promote democracy throughout the world, to expand education for the world’s poorest children, and to combat global HIV/AIDS and malaria.”

In addition, the administration proposes the elimination of 151 federal programs resulting in a savings of \$18 billion. The budget also calls upon Congress to make the 2001 and 2003 tax cuts permanent and proposes \$603 billion in mandatory savings from reforms to Medicaid and Medicare over the next 10 years.

President Bush proposes a deduction for individuals and families who do not have employer-sponsored health care coverage. According to the budget document, "As long as families have at least a catastrophic health insurance policy, they will be able to deduct \$15,000 from their income (\$7,500 for an individual). This will foster a true marketplace for health care, encourage competition, improve the efficiency of the system, and reduce the ranks of the uninsured.

The budget includes three new initiatives to reform the health care marketplace: association health plans that would allow smaller employers "to use collective purchasing power to negotiate lower-priced coverage for their employees, members, and their families"; allowing consumers to purchase health care plans across state lines to encourage competition and "maintain strong consumer protections"; and medical liability reform "to reduce frivolous, time-consuming legal proceedings against doctors and health care providers."

President Bush also calls for the reauthorization of the State Children's Health Insurance Program (SCHIP) (P.L. 110-173). His budget includes a legislative proposal to reauthorize SCHIP through FY2013 at \$19.7 billion. The program would limit coverage to children with family incomes at or below 200 percent of the federal poverty line (\$42,400 or less for a family of four in 2008). It also would include outreach grants of \$50 million for FY2009 and \$100 million for FY2010-2013 to enroll eligible uninsured children.

**Personal Savings**

President Bush again proposes Social Security reform. The budget proposal would “allow workers to use a portion of the Social Security payroll tax to fund voluntary personal retirement accounts. These accounts would give Americans an opportunity to build a nest egg and pursue a higher return on their payroll taxes than is possible in the current system, thereby giving them greater control over their retirement finances. Under the president’s proposal, beginning in 2013 workers will be allowed to use up to four percent of their Social Security taxable earnings, up to a \$1,400 annual limit, to fund their personal retirement accounts. The \$1,400 cap will be increased by \$100, adjusted for wage growth, each year beginning in 2014 and continuing until 2018.”
